Application No.

#### **DETAILED ACTION**

This office action is in response to applicant's reply filed on November 4, 2008.

#### Status of Claims

Cancellation of claim 6 is acknowledged.

Claims 1-5 and 7-9 are currently pending and are the subject of this office action.

Claims 1-4 and 7-9 were withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on April 4, 2008.

Claims 5 is presently under examination.

### **Priority**

The present application is a 371 of PCT/JP04/13652 filed on 09/17/2004, and claims priority to foreign application: JAPAN 2003-326140 filed on 09/18/2003.

Should applicant desire to obtain the benefit of foreign priority under 35 U.S.C. 119(a)-(d) prior to declaration of an interference, a certified English translation of the foreign application must be submitted in reply to this action. 37 CFR 41.154(b) and 41.202(e).

Failure to provide a certified translation may result in no benefit being accorded for the non-English application.

## Rejections and/or Objections and Response to Arguments

Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated (Maintained Rejections and/or Objections) or newly applied (New Rejections and/or Objections, Necessitated by Amendment or New Rejections and/or Objections not Necessitated by Amendment). They constitute the complete set presently being applied to the instant application.

## Claim Rejections - 35 USC § 102 (Maintained Rejection)

Claims 5 stands rejected under 35 U.S.C. 102(b) as being anticipated by Iwao et. al. (JAPAN 2003-095942, cited in prior office action).

The reasons for this rejection have been provided in the previous office action dated July 9, 2008, the text of which is incorporated by reference herein.

Applicant's arguments have been fully considered but are not persuasive.

Applicant argues that the lawo reference does not directly disclose an endurance improving effect with the administration of gallate (a chatechin). Applicant further argues that the mechanism of action disclosed in the Iwao reference (activation of GLUT4 translocation) does not have any correlation with an endurance improving effect, and for that purpose Applicant refers to three references to prove this point.

Examiner's response: while Iwao does not explicitly teaches that the administration of a chatechin will result in an endurance improving effect, the recitation has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See In re Hirao, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and Kropa v. Robie, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Alternatively, although Iwao does not teach that the administration of catechins will result in an endurance improving effect, this property would have necessarily be present in the method of Iwao, since the same composition (catechins) is administered to the same population (athletes or regular individuals exposed to some sort of exercise). In other words, products of identical or similar composition cannot exert mutually exclusive properties when administered under the same circumstances.

MPEP 2112 I states: "The discovery of a previously unappreciated property of a prior art composition, or of a scientific explanation for the prior art's functioning, does not render the old composition patentably new to the discoverer".

Even if, as Applicant claims, there is no correlation between the mechanism of action disclosed by Iwao (activation of GLUT4 translocation) and an endurance improving effect, this becomes irrelevant, because the fact is, that regardless of the mechanism of action, Iwao implicitly (as discussed above) discloses the instant

Art Unit: 1612

invention and as such it anticipates claim 5, even though his rationale for explaining this effect might be wrong.

#### Conclusion

No claims are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

### Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MARCOS SZNAIDMAN whose telephone number is (571)270-3498. The examiner can normally be reached on Monday through Thursday 8 AM to 6 PM.

Application/Control Number: 10/568,064 Page 6

Art Unit: 1612

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frederick F. Krass can be reached on 571 272-0580. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
